BI Developer – Data Analyst

Passionate about data, with solid experience in decision-making dashboards, complex data management, and analytical solution deployment. Holding a Master's degree in Data Engineering (RNCP Level 7), I contributed to large-scale projects at Orange involving ETL, visualization, and data quality. Curious, detail-oriented, and user-focused, I am eager to take on new challenges in data-driven value creation.

Professional Experience

Data Analyst/Data Engineer(Apprenticeship)

Orange UCI PRM – Marseille – Oct. 2022 : Oct. 2024
(Datafactory - Department Customer Experience Performance)

- Automated a secure Power BI executive report (cubes, GCP, SQL Server), delivering real-time KPIs to decision-makers.
- Migrated several Qlik reports to Power BI, eliminating manual work.
- Built 10+ Power BI dashboards for process managers' performance tracking.
- Designed a zone scoring system to target priority areas.
- Partnered with cross-functional teams nationwide.

Data Analyst (Internship)

Orange CI – Abidjan – May 2022 : Sept. 2022

- Performed daily SQL data extractions with additional processing in Python/pandas.
- Built strategic Power BI dashboards, improving project visibility.
- Developed a Python/Dash app with advanced analytics and geographic visualizations to track Orange's coverage zones.

Web & Database Developer (Internship)

Occiweb Radio – Toulouse – Jun. 2021 : Aug. 2021

- Redesigned and modernized the company's website with a responsive, user-friendly interface.
- Restructured the database, enhancing site speed and reliability.
